JUNG'S ARCHETYPES

According to Carl Jung, archetypes are universal patterns, symbols, and themes that exist within the collective unconscious and influence human thoughts and behaviour. Jung's Archetypes

- 1. Persona**
 - The social mask we present to others
 - Helps us adapt to society
- 2. Shadow**
 - The hidden, rejected, or unconscious aspects of personality
 - Often contains impulses we dislike or deny
- 3. Anima/Animus**
 - Anima: Feminine qualities within males
 - Animus: Masculine qualities within females
- 4. Self**
 - Represents unity and integration of the personality
 - The ultimate goal of psychological development
